PROFESSIONAL SUMMARY

Computer Science undergraduate with three internships in full-stack development, Java, and Python/machine learning. Skilled in designing secure RESTful APIs, optimizing database performance, debugging backend issues, and delivering scalable, maintainable code in Agile teams. Strong in DSA, OOP, and DBMS with 300+ coding problems solved. Seeking an entry-level Software Engineer role at Microsoft.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript
Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
Web & Backend: React.js, Node.js, Express.js, REST API Design, JWT Authentication, Authorization, RBAC
Databases: MongoDB, MySQL, PostgreSQL, Query Optimization, Indexing
Data & ML: Pandas, NumPy, TensorFlow, Scikit-learn, ETL Workflows, Power BI
Practices & Tools: Git, GitHub, VS Code, Agile/Scrum, Code Reviews, Debugging, Performance Optimization

EDUCATION

B.Tech in Computer Science and Engineering **Oct 2023 – Aug 2027**
Dr. A.P.J. Abdul Kalam Technical University, Lucknow *CGPA: 7.5/10*

PROFESSIONAL EXPERIENCE

Java Developer Intern **Mar 2026 – Oct 2026**
Infosys Springboard (Virtual Internship 7.0) *Remote*

- Applied Java and OOP principles to build structured, maintainable programs; practiced data structures, algorithms, debugging, and exception handling.

MERN Stack Developer Intern **Sep 2025 – Dec 2025**
Codec Technologies Pvt. Ltd. (AICTE & ICAC Approved) *Remote*

- Developed 5+ full-stack modules using React.js, Node.js, Express.js, and MongoDB, improving data storage/retrieval efficiency by 20%.
- Designed and implemented 10+ RESTful API endpoints with JWT authentication and authorization, enforcing secure access control across workflows.
- Optimized MongoDB queries through indexing and query restructuring, reducing average API response time by 25%.
- Collaborated in a 4-member Agile/Scrum team across 6 sprints; participated in code reviews and debugged backend issues.

Python & Machine Learning Intern **Sep 2024 – Nov 2024**
Softpro India Computer Technologies Pvt. Ltd. (A++ Grade) *Hybrid*

- Automated preprocessing for 3 datasets using Python, Pandas, and NumPy, reducing manual processing time by 30%.
- Trained and evaluated 4 machine learning models with TensorFlow and Scikit-learn, achieving up to 90% accuracy on held-out test data.
- Performed data validation and outlier analysis, reducing inconsistencies by 15%; built 5+ Power BI dashboards.

PROJECTS

Smart Procurement System | *Java/MERN, REST APIs, SQL/NoSQL* GitHub

- Built a procurement management application covering purchase requisitions, multi-level approvals, supplier evaluation, delivery tracking, and inventory management.
- Implemented role-based access control (RBAC) and RESTful APIs for authentication, purchase orders, suppliers, deliveries, and inventory operations.
- Documented 55 API endpoints and structured modular backend components for maintainability and data consistency; designed a weighted supplier-ranking model (pricing, quality, delivery SLAs, reliability).

Pneumonia Detection Using Chest X-Rays | *Python, TensorFlow, Deep Learning* GitHub

- Built an image-classification pipeline for 5,000+ chest X-rays (ingestion, preprocessing, normalization, augmentation, training) organized into 4 reusable stages with model evaluation.
